

CS201 — Data Structures

Course Syllabus · Fall Semester

Course Description

This course covers fundamental data structures including arrays, linked lists, stacks, queues, trees, and graphs, along with their associated algorithms for insertion, deletion, traversal, and search.

Weekly Schedule

Week 1-2: Arrays, Linked Lists

Week 3-4: Stacks and Queues

Week 5-6: Trees and Binary Search Trees

Week 7-8: Heaps and Priority Queues

Week 9-10: Graphs and Graph Traversal

Week 11-12: Sorting Algorithms

Week 13-14: Hash Tables

Week 15: Review and Final Project

Grading

Assignments: 30% Midterm: 25% Final Exam: 35% Participation: 10%

Note

This is a sample PDF used to demonstrate the Notes & PDFs viewer in Nexus Campus. Replace this file (or add more) inside the pdfs/ folder — anything placed there appears automatically.
